

APPS FOR KIDS

Apps can be great educational tools to extend learning opportunities for children. The apps we have in the library are evaluated for use in a library setting. We do not use apps that require an internet connection or ask for registration information. If the app has a "\$" sign, that means there is a cost associated with downloading the app. Some apps are free and may require in app purchases to get the full version. The information was gathered in October 2016 and prices or platform availability may change. We have used age recommendations from review sources to determine where the app is downloaded.

KiPS iPads Children around age two to eight. **TwIPS iPads** Tweens ages eight to twelve. **TiPS iPads** Teenagers.

APP NAME	PLATFORM	COST
